

August 2026

God sent this inspiring and wonder-filled dream to Michael Hartung as a clear explanation and confirmation of the process that our soul has been going through to become the Light of the whole world. It is God's plan that this creation or body of sons shine forth the Light of Truth over the entire world. The process of bringing the sons to this perfection is soon to be completed. In the dream, our brother represents those who are taking part of the work that is being wrought by God's Holy Spirit in us.

Dream and Interpretation of Michael Hartung, a brother in Kentucky.

"I dreamed that I was making beautiful, artistic floor lamps that had four-sided lampshades made of sheets of tree bark.

With the lamps lit, only a slight glow showed through the bark. Because the light was mostly hidden, I wanted to find a better material and thought to use paper."

An Interpretation:

Symbolically, trees represent men/women. The bark would be our skin or rather our outer man of flesh and blood. Currently the glory of God in our inner son shines out only dimly through these flesh bodies. Paper is typically made from the pulp of a tree which I think represents the substance of Christ formed in us which must be brought forth from us so that the outer is clothed with the inner life and substance. We are now seeking our glorified bodies that will allow all His glory to shine out in full radiance from who we really are now.

Hebrews 1:3: We are to be his radiance revealed in human form to all the visible creation (number four) around us.
